

HTML Interview Questions - Answers

1. What is HTML?

HTML (HyperText Markup Language) is the standard markup language used to create and structure web pages.

2. Purpose of <!DOCTYPE html>?

It tells the browser the document uses HTML5 and helps render the page in standards mode.

3. HTML vs HTML5

HTML5 adds semantic elements, multimedia support, canvas, improved forms, and modern APIs.

4. <head> element

Contains metadata such as title, stylesheets, scripts, and meta tags.

5. meta charset

Specifies UTF-8 character encoding.

6. Semantic elements

Elements like header, nav, main, article, section, aside, and footer that describe content meaning.

7. HTML5 forms

Provides new input types, validation, placeholder, required, autocomplete, etc.

8. canvas

Used to draw graphics dynamically with JavaScript.

9. figure and figcaption

Used for self-contained content with an optional caption.

10. Embed audio

Use the audio element with one or more source elements.

11. alt attribute

Provides alternative text for accessibility and when images cannot load.

12. details and summary

Create expandable/collapsible content.

13. span vs div

span is inline; div is block-level.

14. Hyperlink

Use the anchor (a) element with the href attribute.

15. target='_blank'

Opens the link in a new tab or window.

16. nav

Represents navigation links.

17. aside

Represents tangential or sidebar content.

18. Embed video

Use the video element.

19. time

Represents dates and times in a machine-readable format.

20. Numbered list

Use the ol element.

21. Responsive web design

Design pages that adapt to different screen sizes using flexible layouts and media queries.

22. colspan and rowspan

Allow table cells to span multiple columns or rows.

23. Comment

Use <!-- comment -->.

24. abbr

Represents an abbreviation or acronym.

25. Line break

Use the br element.

26. mark

Highlights text.

27. Disable form element

Use the disabled attribute.

28. autocomplete

Lets the browser automatically fill form values.

29. Embed SVG

Use inline SVG, img, object, or embed.

30. download attribute

Prompts the browser to download the linked resource.
